

CLEARPRINT

CLEAR AND PRINTED FILM SHRINK BUNDLER

Polypack's CLEARPRINT machines produce bulls-eye wraps using either clear or print registered film. These machines operate at speeds up to 60 wraps per minute single lane and up to 120 per minute in dual lane. These shrink packaging machines can be manufactured to run unsupported, pad-supported or tray-supported product. Polypack's CLEARPRINT wrappers index product into an overhead flight bar assembly. The flight bars advance collated product in time with our patented film delivery system.

POLYPACK'S CLEARPRINT SERIES packaging machines are the simplest, most versatile, easiest to change over, most compact, most affordable and most cost effective automatic print registration wrappers ever produced.
